

Family: FABACEAE-MIMOSOIDEAE (angiosperm)

Scientific name(s): Cedrelinga catenaeformis

Commercial restriction: no commercial restriction

WOOD DESCRIPTION

Color: light brown
Sapwood: not clearly demarcated
Texture: coarse
Grain: straight or interlocked
Interlocked grain: slight

Note: Heartwood light brown with pink or orangey glints. Grain sometimes oblique.

LOG DESCRIPTION

Diameter: from 70 to 120 cm
Thickness of sapwood: from 5 to 8 cm
Floats: yes
Log durability: low (must be treated)

PHYSICAL PROPERTIES

Physical and mechanical properties are based on mature heartwood specimens. These properties can vary greatly depending on origin and growth conditions.

	<u>Mean</u>	<u>Std dev.</u>
Specific gravity *:	0,51	0,08
Monnin hardness *:	2,0	1,0
Coeff. of volumetric shrinkage:	0,46 %	0,03 %
Total tangential shrinkage (TS):	6,9 %	0,9 %
Total radial shrinkage (RS):	3,8 %	0,7 %
TS/RS ratio:	1,8	
Fiber saturation point:	29 %	

Stability: moderately stable

Note: TORNILLO properties vary according to the origin.

MECHANICAL AND ACOUSTIC PROPERTIES

	<u>Mean</u>	<u>Std dev.</u>
Crushing strength *:	38 MPa	8 MPa
Static bending strength *:	70 MPa	13 MPa
Modulus of elasticity *:	10900 MPa	942 MPa

(*: at 12% moisture content, with 1 MPa = 1 N/mm²)

Musical quality factor: 97,1 measured at 2723 Hz

NATURAL DURABILITY AND TREATABILITY

Fungi and termite resistance refers to end-uses under temperate climate. Except for special comments on sapwood, natural durability is based on mature heartwood. Sapwood must always be considered as non-durable against wood degrading agents.

E.N. = Euro Norm

Funghi (according to E.N. standards): class 3 - moderately durable

Dry wood borers: susceptible - sapwood not or slightly demarcated (risk in all the wood)

Termites (according to E.N. standards): class S - susceptible

Treatability (according to E.N. standards): class 2-3 - poorly to moderately permeable

Use class ensured by natural durability: class 2 - inside or under cover (dampness possible)

Species covering the use class 5: No

Note: This species is listed in the European standard NF EN 350-2.

REQUIREMENT OF A PRESERVATIVE TREATMENT

Against dry wood borer attacks: requires appropriate preservative treatment

In case of risk of temporary humidification: requires appropriate preservative treatment

In case of risk of permanent humidification: use not recommended

DRYING

Drying rate: rapid

Risk of distortion: slight risk

Risk of casehardening: no

Risk of checking: slight risk

Risk of collapse: no

Possible drying schedule: 4

M.C. (%)	Temperature (°C)		Air humidity (%)
	dry-bulb	wet-bulb	
Green	42	39	82
50	48	43	74
40	48	43	74
30	48	43	74
15	54	46	63

This schedule is given for information only and is applicable to thickness lower or equal to 38 mm.

It must be used in compliance with the code of practice.

For thickness from 38 to 75 mm, the air relative humidity should be increased by 5 % at each step.

For thickness over 75 mm, a 10 % increase should be considered.

SAWING AND MACHINING

Blunting effect: normal

Sawteeth recommended: ordinary or alloy steel

Cutting tools: ordinary

Peeling: good

Slicing: not recommended or without interest

Note: Fuzzy surface. Sawdust can irritate nose and throat. Filling is recommended in order to obtain a better finish.

ASSEMBLING

Nailing / screwing: poor

Gluing: correct

Note: Nails holding varies according to specific gravity.

COMMERCIAL GRADING

Appearance grading for sawn timbers: According to NHLA grading rules (January 2007)

Possible grading: FAS, Select, Common 1, Common 2, Common 3

FIRE SAFETY

Conventional French grading: Thickness > 14 mm : M.3 (moderately inflammable)

Thickness < 14 mm : M.4 (easily inflammable)

Euroclasses grading: D s2 d0

Default grading for solid wood, according to requirements of European standard EN 14081-1 annex C (April 2009). It concerns structural graded timber in vertical uses with mean density upper 0.35 and thickness upper 22 mm.

END-USES

Formwork
Turned goods
Veneer for interior of plywood
Current furniture or furniture components
Boxes and crates
Exterior joinery
Interior panelling
Wood frame house

Moulding
Interior joinery
Blockboard
Pulp
Fiber or particle boards
Exterior panelling
Glued laminated
